SUMMARY

As a full-stack developer with 1 year of experience, I have a strong foundation in building dynamic and efficient web applications. Additionally, I have 6 months of experience working with Google Apps Script, streamlining processes and automating tasks. My professional journey includes hands-on experience in South Africa, Kenya, and a year at Rajmandir Hypermarket, where I contributed to developing and maintaining robust digital solutions. With a problem-solving mindset and a passion for innovation, I excel at creating user-friendly applications that meet business needs.

SKILLS

- APP SCRIPT

WORK EXPERIENCE

DESTOP APP

(2025 Jan - 2025 Mar)

WABoss (whatsapp automation)

- Bulk Messaging & Scheduling: Send messages in bulk and schedule them for timely delivery.
- Template Management: Create, store, and reuse customizable message templates for quick communication.
- Group-Wise Contact Management: Efficiently manage and organize contacts based on groups.
- Randomized Time Gaps: Add time gaps between messages to prevent spam detection and ensure compliance.
- Advanced Scraping Features: Extract data from WhatsApp for insights and better contact management.
- Explore these powerful features and many more! Visit [Waboss](#)

STOCK MANAGMENT WEB APP

(2024 May - 2024 Oct)

Rajmandir Hypermarket

- Developed a user-friendly dashboard using Next.js and Tailwind CSS for real-time stock insights.
- Implemented efficient bulk data upload and download capabilities for managing large datasets.
- Integrated PDF generation for detailed stock reports and streamlined reporting processes.
- Enhanced form file optimization for faster and more accurate data entry.
- Added OTP-based login verification with WhatsApp integration for secure and seamless user authentication, built on Node.js and MongoDB

APP SCRIPTS

(2023 Jul - 2023 Dec)

Student Management, Employee Management, Invoice Generator, ...

- Developed and automated Student Management, Employee Management, and Invoice Generation systems using Google Apps Script.
- Created custom scripts for seamless data handling and report generation in Google Sheets.
- Integrated email automation for sending notifications and reports directly from Google Workspace.
- Implemented role-based access and data validation for enhanced security and accuracy.
- Streamlined workflows by automating repetitive tasks, improving productivity and operational efficiency.
