## Work Experience

---

### Full Stack Developer

Rajmandir hypermarket-Delhi, Delhi

Full-time

May 2024 to July 2024

Project Title: Stock Management System

Company: Rajmandir Hypermarket

Duration: May 2023 - July 2023

Role: Full-Stack Developer

Key Responsibilities:

- **Front-End Development:** Redesigned the stock management website's user interface using Next.js, NextUI, and Tailwind CSS to enhance user experience and accessibility.
- **Feature Development:** Implemented new features such as a personalized dashboard, advanced customizable filters, bulk data upload and download capabilities for large datasets, password reset with OTP sent via WhatsApp, personalized template messages for WhatsApp, and image resizing and handling.
- **Back-End Modernization:** Migrated the back-end system from a legacy platform to a Node.js and MongoDB architecture to improve scalability and performance.
- **Cross-Functional Collaboration:** Worked closely with design, marketing, and other teams to ensure project alignment and successful delivery.

Achievements:

- Successfully launched the modernized stock management system, resulting in a 25% increase in efficiency and improved user satisfaction.
- Acquired proficiency in Next.js, NextUI, Tailwind CSS, Node.js, MongoDB, and RESTful API development.
- Demonstrated strong problem-solving skills by effectively troubleshooting and resolving complex technical issues.

Project Title: Student Management System with Moodle

Technologies Used: React, Material UI, Tailwind Css

Key Features:

- Developed a personalized dashboard for administrators, teachers, and students, providing tailored information and access to relevant features.
- Implemented role-based access controls to restrict access to sensitive data and functionalities.
- Integrated Moodle for online course delivery, assignment submission, and quiz administration.
- Created a student inquiry system allowing students to submit questions and receive timely responses from teachers.
- Developed a fee submission and tracking module to streamline the payment process.
